Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 4, 2004 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 87 and 105 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 87 is indefinite because it is inconsistent with claim 70. Claim 70 requires a separate catalyst precursor but claim 87 includes the limitation that no catalyst precursor is added. Therefore, the scope of claim 87 is unclear.

Claim 105 is indefinite because it is inconsistent with claim 88. Claim 105 requires a separate catalyst precursor but claim 88 includes the limitation that no catalyst precursor is added. Therefore, the scope of claim 105 is unclear.

Art Unit: 1764

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 27, 28, and 70-105 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Each of these claims contains the limitation that either a separate catalyst is required or no separate catalyst is required. The specification as filed does not include any reference as to the presence or absence of a catalyst and since catalytic processes are unpredictable, it would have required undue experimentation to determine whether or not a catalyst should be present in the process.

Allowable Subject Matter

Claims 1, 3-5, 9-16, 23, and 24 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Claims 1, 3-5, 9-16, 23, and 24 are allowable because the prior art of record does not disclose or suggest the step of controlling the free radical precursor of the solution by adding a substance chosen from a group consisting of waste plastic material, polyvinyl, chloride, and polyurethane.
